Analog - something that has a continuously changing range of values or measurements, as opposed to digital where there are discrete values that jump from one to another. A slide rule is an analog computer. Analysis Paralysis--a player presented with too many decisions, or too many plausible choices for a decision, may effectively "freeze up" and do nothing for quite a while.

The ultimatum game is a game that has become a popular instrument of economic experiments. It was first described by Werner Güth, Rolf Schmittberger, and Bernd Schwarze: One player, the proposer, is endowed with a sum of money. The proposer is tasked with splitting it with another player, the responder. Once the proposer communicates their decision, the responder may accept it or reject it.
