Heroin, also known as diamorphine among other names, is an opioid most commonly used as a recreational drug for its euphoric effects. It is used medically in several countries to relieve pain or in opioid replacement therapy. It is typically injected, usually into a vein, but it can also be smoked, snorted, or inhaled.

Often new members do not notice the age of a post when reading as far back as they can. I know when I first find a forum of interest, I read back as far as I can make time for to glean every kernel of info I can and it is galling to see an old, unsolved post that I know an answer for and know that the odds of the original poster still being around and/or caring is somewhere between fat and slim.
